

Looking for a Web3 Builder

Are you passionate about blockchain, gaming, and decentralized technologies?

Do you want to be part of an ambitious project that blends crypto, social engagement, and interactive experiences? If so, we want to talk to you!

About the Project

We are building a next-gen Web3 platform designed to engage users in a dynamic and competitive environment. Our goal is to create an experience that is interactive, community-driven, and deeply integrated with the crypto ecosystem.

We're already working on:

- ✓ A functional MVP ready to scale.
- ✓ Innovative token utility and economic model.
- ✓ Integrating blockchain and DeFi elements for real-world impact.
- ✓ A fast-growing community excited for launch.

Who We Need

We're looking for a Web3 builder who can take this project to the next level. Someone who:

- 🔥 Has experience with blockchain development (Solana, Ethereum, or similar).
- 🔥 Understands smart contracts, DeFi integrations, and scaling decentralized applications.
- 🔥 Can work in a fast-moving environment and turn ideas into reality.
- 🔥 Is passionate about disrupting the current landscape and pushing Web3 forward.

Key Responsibilities:

- ◆ Building, testing, and deploying smart contracts to testnets and mainnets using technologies like Solidity.
- ◆ Working on Web3 integrations with the Web2 and UI/UX teams, partner organizations, and the business development team.
- ◆ Designing & optimizing scalable and robust services that will run at scale.

An Ideal Candidate Will:

- ✓ Work largely independently, but never hesitate to ask for assistance when blocked.
- ✓ Self-manage tasks without hand-holding.
- ✓ Maintain a neat and tested code environment.
- ✓ Be detail-oriented when it comes to developing excellent-looking UI/UX.
- ✓ Be able to make excellent independent decisions around design and development when designs are not complete or need developer insight.
- ✓ Know when to ask for help from designers or project leaders.
- ✓ Have an in-depth understanding of keeping client pages fast and responsive from both the frontend and backend.
- ✓ Have an in-depth understanding of blockchain/Web3 technology.

Why Join Us?

- 🚀 Be part of an ambitious and innovative Web3 project.
- 💰 Equity & token incentives available – we grow together.
- 🌍 Remote-first & globally focused.
- 🔥 A chance to shape the future of decentralized experiences.

Next Steps

If this sounds like something you're excited to build, let's connect! Send me a DM or apply directly.
